

MWM / DEUTZ ZS-x IGNITION UNITs FOR MEDIUM-SIZED DEUTZ ENGINES

The TEM ZS-1, ZS-2 and ZS-3 are full-featured industrial ignition systems, similar to the Altronic CPU-95 line and exclusively manufactured for the complete Deutz gas-engine of 8 to 20 cylinders. The TEM systems are only available through the Deutz / MWM sales network but Hatraco can offer, fully authorized, test and repair service for these types of ignition modules.
